Drought: Plan now or Pay later

A **Webinar** you don't want to miss!

Here's why:

- 1) More than half the counties in South Dakota were already abnormally dry in late February (U.S. Drought Monitor).
- 2) On average, **drought comes to South Dakota every three years.**
- 3) Many ranchers who think they're prepared, aren't. You sure you're ready? Afraid you might be forced to overgraze or sell cattle at low market prices?
